 **Track Assets - Offline** [View Scans](#) [Edit](#) [Duplicate](#) [Delete](#)
Validate Scans On-Device
Scans will be validated offline on the database "Asset Tracking", which will be downloaded to each device before users are allowed to scan. Users can upload scans later at their discretion. A duplicate barcode will scan as valid.

 **Track Assets - Online** [View Scans](#) [Edit](#) [Duplicate](#) [Delete](#)
Validate Scans Online
Scans will be validated on the database "Asset Tracking" and saved in the cloud. If a device loses its Internet connection, scans will be saved on the device without validation. Users can upload scans later at their discretion. Download new database prompt will automatically appear after scans are uploaded. A duplicate barcode will scan as valid.
