

Sample code snippets for the `__SCAN_RESPONSE__` variable

A- If not using quotes in the response:

```
<script type="text/javascript">

function getScanResponse() {
    return "__SCAN_RESPONSE__";
}

</script>
```

B - If using quotes in the response:

```
<html>
<head>
<title>Example</title>

<script type="text/codereadr" id="responseVarId">__SCAN_RESPONSE__</script>

<script type="text/javascript">

function getScanResponse() {
    let responseVal = document.getElementById("responseVarId").innerHTML;
    document.getElementById("responseDiv").innerHTML = responseVal;
    return responseVal;
}

</script>
</head>
<body>
<br/><br/>
<a href="#" onclick="javascript:alert(getScanResponse())">ALERT RESPONSE</a>
<br/><br/>
<div id="responseDiv" style="border:2px solid green"></div>
</body>
</html>
```
